TRADITION

In business since 1913, Edward A. Anderson Company has one of the longest traditions in residential architecture and construction on Chicago's North Shore.

We work on all types of projects, including additions, interior and exterior alterations, renovations, restorations, preservations, new homes and general maintenance.

We are Carpenters, Craftsmen, Architects and Historic Renovators who take great pride in everything we do. With a local office and workshop we are near by and responsive to any need no matter how large or small.

Through four generations of family management we have continued to uphold our founders' original inspiration. We promise to deliver for you the highest quality construction using the safest, most cost effective and expedient means possible. We make sure our work is built to last the test of time.

Whether you work with us for design and construction or simply construction, your experience will be a pleasurable one, free of frustration and worry during the process and a source of pride for years to come.

Working with us you'll know you've made the very best choice.

UNIQUE

We are a boutique design and construction group providing you a "one-stop" shop for all your Architecture and Construction needs. We do not mold your project to fit a cookie-cutter process but instead utilize our experience to tailor a plan just right for you.

PARTNERS

We collaborate with you in a friendly, timely and knowledgeable manner for a working relationship that will exceed your expectations. We avoid multiple layers of staff so every client can work directly with our owner.

DEDICATED

You can trust us to bring the best design ideas for any challenge large or small. We have an extensive group of expert vendors offering competitive pricing and loyal service. Our team has always been committed to long term relationships.
